### **THE BOARD OF MANAGEMENT’S STATEMENT OF RESPONSIBILITY**

The Board of Management of the Company is responsible for preparing the interim financial statements, which give a true and fair view of the financial position of the Company as at 30 June 2025, and its financial performance and its cash flows for the period then ended in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to interim financial reporting. In preparing these interim financial statements, the Board of Management is required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable accounting principles have been followed, subject to any material departures disclosed and explained in the interim financial statements;
- prepare the interim financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business; and
- design and implement an effective internal control system for the purpose of properly preparing and presenting the interim financial statements so as to minimize errors and frauds.

**STATEMENT OF THE BOARD OF MANAGEMENT (Continued)**

The Board of Management is responsible for ensuring that proper accounting records are kept, which disclose, with reasonable accuracy at any time, the financial position of the Company and that the interim financial statements comply with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to interim financial reporting. The Board of Management is also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of frauds and other irregularities.

The Board of Management confirms that the Company has complied with the above requirements in preparing these interim financial statements.

For and on behalf of the Board of Management,

## REPORT ON REVIEW OF INTERIM FINANCIAL STATEMENTS

To: The Shareholders, the Board of Directors and the Board of Management  
PTSC Offshore Services Joint Stock Company

We have reviewed the accompanying interim financial statements of PTSC Offshore Services Joint Stock Company (the "Company") prepared on 13 August 2025 as set out from page 5 to page 39, which comprise the interim balance sheet as at 30 June 2025, the interim income statement and interim cash flow statement for the 6-month period then ended, and a summary of significant accounting policies and other explanatory information.

### *The Board of Management's Responsibility for the Interim Financial statements*

The Board of Management is responsible for the preparation and fair presentation of these interim financial statements in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to interim financial reporting, and for such internal control as the Board of Management determines is necessary to enable the preparation of interim financial statements that are free from material misstatement, whether due to fraud or error.

### *Auditors' Responsibility*

Our responsibility is to express a conclusion on the accompanying interim financial statements based on our review. We conducted our review in accordance with Vietnamese Standard on Review Engagements (VSRE) 2410 – "Review of Interim Financial Information Performed by the Independent Auditor of the Entity".

A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Vietnamese Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### *Conclusion*

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial statements do not present fairly, in all material respects, the interim financial position of the Company as at 30 June 2025, and of its interim financial performance and its interim cash flows for the 6-month period then ended in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to interim financial reporting.

12/08/2025

## REPORT ON REVIEW OF INTERIM FINANCIAL STATEMENTS (Continued)

### Other Matter

The financial statements of the Company for the year ended 31 December 2024 have been audited by another independent audit firm, which expressed an unmodified opinion on those statements on 07 March 2025.

The interim financial statements of the Company for the 6-month period ended 30 June 2024 have been also reviewed by the same audit firm, which expressed an unmodified conclusion on those statements on 29 July 2024.

The significant accounting policies, which have been adopted by the Company in the preparation of these interim financial statements, are as follows:

#### Estimates

The preparation of interim financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to interim financial reporting requires the Board of Management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these accounting estimates are based on the Board of Management's best knowledge, actual results may differ from those estimates.

#### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments (not exceeding 3 months) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

#### Held-to-maturity investments

Held-to-maturity investments comprise term deposits exceeding 3 months that the Company has the positive intent and ability to hold to maturity.

Held-to-maturity investments are recognised on a trade date basis and are initially measured at acquisition price plus directly attributable transaction costs. Post-acquisition interest income from held-to-maturity investments is recognised in the income statement on accrual basis.

#### Receivables

Receivables represent trade receivables from customers arising from sales of rendering of services or non-trade receivables from others and are stated at cost. Provision for doubtful debts is made for each outstanding amount based on overdue days in payment according to the initial payment commitment (exclusive of the payment rescheduling between parties), or based on the estimated loss that may arise. The difference between the provision of this year and the provision of the previous year is recognised as an increase or decrease of general and administration expenses in the year. Bad debts are written off when identified as uncollectible.

Receivables are classified into long-term and short-term receivables on the balance sheet based on the remaining period from the balance sheet date to the maturity date.

#### Inventories

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and where applicable, direct labour costs and those overhead expenses, purchase cost, conversion costs and other costs incurred in bringing the inventories to their present location and condition. The Company applies perpetual method to account for inventories. Cost is calculated using the weighted average method. Net realisable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

### Tangible fixed assets and depreciation

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use.

	<b><u>Years</u></b>
Buildings and structures	6 - 25
Machinery and equipment	3 - 7
Motor vehicles	6 - 7
Management equipment	3 - 5

Loss or gain resulting from sales and disposals of tangible fixed assets is the difference between the net proceeds from sales or disposals of assets and their carrying amount and is recognised in the income statement.

## Intangible assets and amortisation

Intangible assets represent computer software that is stated at cost less accumulated amortisation. The computer software is amortised using the straight-line method over a period of 3 years.

### Construction in progress

Construction in progress represents the cost of assets in the course of installation or construction for production, rental or administrative purposes, or for purposes not yet determined, which are recorded at cost and are comprised of such necessary costs to construct, repair and maintain, upgrade, renew or equip the projects with technologies as construction costs in accordance with the Company's accounting policies. Depreciation of these assets, on the same basis as other fixed assets, commences when they are ready for their intended use.

## Prepayments

Prepayments are expenses which have already been paid but relate to results of operations of multiple accounting periods.

Short-term prepaid expenses include insurance and other expenses which are allocated to the interim income statement on a straight-line basis over a period of not more than twelve months.

Long-term prepaid expenses include construction, repair and maintenance costs, costs of tools and supplies, long-term spare parts and other expenses which are allocated to the interim income statement on a straight-line basis over a period of more than twelve months.

Unearned revenue

Unearned revenue mainly comprises the amounts that customers have paid in advance for one or many accounting periods for transportation services. The Company records unearned revenue for the future obligations that the Company has to fulfil. Unearned revenue is recognised as revenue in the income statement during the year to the extent that revenue recognition criteria have been met.

### **Payable provisions**

Payable provisions are recognised when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation. Provisions are measured at the management's best estimate of the expenditure required to settle the obligation as at the balance sheet date.

In the event that the Company has a contract with a high risk, the present obligation under the contract will be recognized and accounted for as a provision. The expected loss from a high risk contract is recognized when the best estimate of the total contract cost exceeds the expected contract value.

The provision for major periodic repairs of fixed assets is included in the annual production and business expenses based on the estimate up to the year when the repair of the asset is expected to occur. In the period when the repair occurs, if the actual repair cost is greater than the estimated provision or vice versa, the difference is recognized in the income statement of business results of that period.

### **Fund for scientific and technological development**

The scientific and technological development fund is established to create a source of investment for scientific and technological activities of the Company. The fund is formed based on the Company's technological development and innovation needs and is recognised on the interim income statement in accordance with Joint Circular No. 12/2016/TTLT-BKHCHN-BTC issued by the Ministry of Finance on 28 June 2016. Accordingly, the Company bases on the need to use capital sources for scientific and technological activities to set up to 10% of the taxable income of corporate income tax in the period to form the fund.

### **Appropriation of profit**

Profit after corporate income tax could be distributed to shareholders in accordance with the Resolutions of the Annual General Meeting of Shareholders, including dividend distribution and appropriation to funds in accordance with the Company's charter and Vietnamese regulations.

The Company's dividends are recognised as a liability on the interim financial statements in the period in which the shareholder list for dividend payment is finalised according to Resolution of the Board of Directors after the dividends are approved by shareholders at the Annual General Meeting of Shareholders.

The Company's funds are as below:

### **Investment and development fund**

Investment and development fund is appropriated from profit after corporate income tax of the Company and approved by shareholders at the General Meeting of shareholders. This fund is used for investment and development purposes of the Company.

### **Bonus and welfare funds**

Bonus and welfare funds are appropriated from the Company's profit after corporate income tax and subject to shareholders approval at the General Meeting of shareholders. The funds are presented as a liability on the balance sheet and are used for bonus and welfare contribution to employees.

## Revenue recognition

### *Revenue from rendering of services*

Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, revenue is recognised in each period by reference to the percentage of completion of the transaction at the balance sheet date of that period. The outcome of a transaction can be measured reliably when all four (4) following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits associated with the transaction will flow to the Company;
- (c) the percentage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

### *Construction Contract Revenue*

A construction contract is a contract specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of design, technology and functions or ultimate purpose of use.

When the outcome of a construction contract cannot be reliably estimated, contract revenue is recognised to the extent of contract costs incurred where it is probable those costs will be recoverable. Contract costs are only recognised when incurred during the period.

When the outcome of a contract can be estimated reliably, contract revenue and contract costs are recognised over the period of the contract as revenue and expenses, respectively. The Company uses the percentage of completion method to determine the appropriate amount of revenue and costs to be recognised in the accounting period. The percentage of completion is measured by reference to the proportion of actual completed work incurred to date to the estimated total work of each contract, the evaluation of the completed work. Where it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

When the outcome of a contract can be estimated reliably and the contractor is paid for the works performed and certified by the customer, contract revenue and contract costs are recognised in the period for the works performed and certified by customer.

Revenues from construction contracts are comprised of the revenue initially set out in contracts; increases and/or decreases during the term of the contract; bonuses; and other payments to be received from customers or other parties to compensate for the costs not included in the contractual price; other payments that customers agreed to compensate; and other payments provided that these amounts can change the revenue and can be reliably determined.

### *Interest income*

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate.

### *Foreign currencies*

Transactions arising in foreign currencies are translated at exchange rates ruling at the transaction dates. Foreign exchange differences arising from these transactions are recognised in the income statement.

Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are respectively translated at the buying and selling exchange rates at the balance sheet date of the commercial bank with which the Company regularly transacts. Foreign currencies deposited in bank at the balance sheet date are translated at the buying exchange rate of the commercial bank where the Company opens its foreign currency accounts. Foreign exchange differences arising from these translations are recognised in the income statement.

#### Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

#### Segment reporting

A segment is a component which can be separated by the Company engaged in sales of goods or rendering of services ("business segment"), or sales of goods or rendering of services within a particular economic environment ("geographical segment"). Each segment is subject to risks and returns that are different from those of other segments. A reportable segment is the Company's business segment or the Company's geographical segment.

An ordinary share has par value of VND 10,000 per share. The Company has one class of ordinary shares and the shareholders of ordinary shares are entitled to receive dividend as declared from time to time and are entitled to one vote per share at the Company's shareholders' meetings. All shares rank equally with regard to the Company's residual assets. The rights of the shares acquired by the Company are suspended until they are reissued.

According to Resolution No. 09/NQ-POS-DHĐCĐ dated 27 June 2025, the General Meeting of Shareholders approved the issuance of shares to increase charter capital from equity capital by issuing ordinary share, with a par value of VND 10,000 per share. The expected number of shares to be issued is 6,000,000 shares, and the total expected issuance value calculated at par value is VND 60,000,000,000. In the period and up to the date of these interim financial statements, the Company has not issued those shares.

39. SUPPLEMENTAL DISCLOSURES OF CASH FLOW INFORMATION

Non-cash transactions affecting the interim cash flow statement

Cash outflows for acquisition and construction in progress during the period exclude VND 21,007,965,443 (previous period: VND 24,772,900,443), representing amounts for the acquisition and construction of fixed assets that have not yet been paid. Accordingly, the corresponding amounts have been adjusted under changes in payables.

Cash inflows from interest earned during the period exclude VND 8,358,898,902 (previous period: VND 5,588,894,685), representing interest income accrued during the period but not yet received. Accordingly, the corresponding amount has been adjusted under changes in receivables.

40. OTHER MATTER

The Company is currently involved in a legal dispute with MISC Offshore Floating Terminals (L) Limited ("MOFT") arising from the execution of Contract No. C-MOFT-OBUSSE-CTM-2024-0002 in relation to FSO Benchamas/FPSO BUK project. Specifically, MOFT unilaterally terminated the contract on July 31, 2024 with the Company. In 2025, the Company initiated a lawsuit against MOFT at the High Court of Singapore, seeking compensation for certain completed work that had not been formally accepted at the time of early termination of contract.

As at the date of the interim financial statements, both parties are still in legal proceedings with the Court to clarify their obligations (if any).

Re: Explanation the difference in profit after corporate income tax (Financial Statements for the first half of 2025).

To: - The State Securities Commission  
- Hanoi Stock Exchange

Referring to Article 14 of Circular No. 96/2020/TT-BTC issued by Ministry of Finance on 16/11/2020 guiding information on the stock market;

PTSC Offshore Services Joint Stock Company (stock code: POS) would like to explain the difference in Profit after corporate income tax of 10% or more compared to the same period last year as follows:

Unit: VND

No	Item	The first half of 2025	The first half of 2024	Difference	
				Amount (+/-)	Rate %
1	Profit after corporate income tax	37.316.909.706	53.345.981.705	-16.029.071.999	-30,05%

POS Company's profit after tax for the first half of 2025 decreased compared to the same period in 2024, due to:

- Decreased revenue from sales and services rendered.
- Reduced other income due to a lower reversal of warranty provision compared to the same period last year.

POS Company respectfully provides this information.

**Recipient:**
